## **Hand and Power Tools!**

### **Did You Know...**

- Always follow operating instructions and use the proper accessories when using hand and power tools.
- Tools should not be used for other than their intended use.
- Keep all cutting tools sharp.
- Maintain tools in a safe condition without broken or damaged parts, frayed cords, etc. Immediately remove faulty tools from service when identified.
- Never use tools which have burred, cracked, or mushroomed heads and never carry loose tools in your pockets.
- Always consider body position when pushing and pulling on tools, consider the unexpected to avoid strains, cuts, falls.
- Always store tools immediately after use. This prevents them from becoming falling objects, tripping hazards, and extends their life.
- Pre-plan and stay focused on the task, any tool can be dangerous and can instantly injure if the tool slips, binds, or catches clothing.

Remember, use the right tool for the job and don't forget the proper personal protective equipment.
